

Creating Titles and Descriptions for Items in an E-commerce

Main Goal:

Develop a system capable of processing a list of items and generating titles and descriptions for these items.

what kind of item ?

In this case, the focus is primarily on automotive items, but it could potentially include any type of item.

Input

These items are all disorganized, some contain more information than others, but typically, we possess only minimal details about each item.

This list will be provided in a Google Sheet by the supplier,
accompanied by a PDF of the company's catalog."

**CBX18 - CAPACITY FOR 19 CANS OF 330ML
WITH A CAPACITY OF 18 LITERS**
While driving, you simply use the vehicle's 12/24V connection. Parked, you can connect to the 110-220V network. This way, products can stay fresh and frozen without worry.

Cooling capacity: from +20°C to -20°C
Energy consumption: 45W
Input voltage (AC): 100-240 V
Input voltage (DC): 12/24 V
External dimensions: 58.5cm x 33.5cm x 29cm (height)
Weight: 12.8kg
Noise: 38dB

LED light inside for use in dark places
Ergonomic carrying handles
USB connection (CBX18)
Freezing and deep freezing
Removable internal basket

Battery protection
Functional design
Energy class: A++
No ice formation
Delivery:

We work with the best carriers to speed up delivery and take care of the product.

Packaging:
Special packaging to prevent damage to the product during transport.

Important:
12-month warranty;
Installation must be done by a specialized professional."
